

Name: Rane Saurabh Chandrakant

Year: TY

My programming career started from FY B.Tech & since then I've been exploring all the domains of Computer programming. I've worked on many projects in almost all the domains except Web development. As of now, I am Cyber Security Head at TRF Robosoft.

I would like to express myself as a person who is fascinated by technological advancements in any field of science. I am deeply interested in the concepts of Quantum Physics & Astronomy. As much as I like reading thesis and research papers, I don't quite enjoy documenting a project. I am looking forward for my future to be in tech domain.
